

Realtor AI Accelerator: Workshop Plan

This document outlines the structure, content, and learning objectives for the 2.5-hour “Realtor AI Accelerator” workshop. It includes a detailed workshop outline and a formal syllabus.

Workshop Outline (2.5 Hours)

The workshop is designed to be highly interactive and action-oriented, with a focus on providing realtors with practical AI skills they can implement immediately. The 2.5-hour block is divided into four parts, with integrated hands-on sessions.

Part	Duration	Title	Description
1	30 mins	The AI-Powered Agent: A New Era of Real Estate	This section introduces the transformative potential of AI in real estate, covering the essential AI tools and guiding attendees through their first AI-generated content creation.
2	60 mins	Content Creation on Autopilot	This is a deep dive into AI-driven content creation, from writing compelling listing descriptions to generating a month’s worth of social media content from a single idea. It includes a hands-on session on creating graphics with Canva AI.
3	45 mins	The Automated Follow-up Machine	This part focuses on automating client communication and lead management. Attendees will learn to use AI for crafting personalized follow-ups, building automated drip campaigns, and prioritizing leads with AI-powered scoring.
4	15 mins	The Future is Now: Your AI Roadmap	The final section provides a clear action plan for attendees to continue their AI journey. It also introduces the upsell opportunities for brokerage training, one-on-one coaching, and done-for-you services.

Syllabus

Course Title

Realtor AI Accelerator: Turn AI Into Your Business Assistant

Course Description

This intensive 2.5-hour workshop is designed for real estate professionals who want to leverage the power of Artificial Intelligence to automate their marketing, streamline their workflow, and gain a competitive edge. Participants will walk away with actionable strategies, hands-on experience with leading AI tools, and a set of templates and resources to implement immediately in their business. This is not a theoretical overview; it is a practical, hands-on workshop that will equip you with the skills to turn AI into your most valuable assistant.

Learning Objectives

Upon successful completion of this workshop, participants will be able to:

- **Master AI-Powered Content Creation:** Generate high-quality listing descriptions, social media content, and video scripts in a fraction of the time.
- **Automate Client Communication:** Build and implement automated follow-up sequences and personalized client messaging using AI.
- **Design Stunning Visuals with AI:** Create professional-grade marketing graphics and branding assets using Canva AI.
- **Implement an AI-Driven Content Strategy:** Learn how to repurpose a single content idea into a full month of marketing materials.
- **Leverage AI for Market Analysis:** Utilize AI tools to generate market insights, neighborhood summaries, and talking points for CMAs.
- **Develop an AI-Powered Workflow:** Integrate AI tools into your daily operations to save time, reduce administrative tasks, and focus on high-value activities.

Prerequisites

This workshop is designed for realtors, entrepreneurs, and business owners of all technical skill levels. No prior experience with AI or coding is required. Participants should bring a laptop and have an open mind to explore new technologies.
